Experience

Programmer / Analyst | Berkshire Hathaway Shoe Holdings | September 2022 - Present
- Build, refine and maintain a complex, legacy Warehouse Management System(WMS) designed to track, store and analyze large quantities of both real-time and archived data.
- Design, architect and write WMS 2.0 based on documentation written for the current system.
- Operations programming – we write both ad-hoc and planned programs ranging from automation and data-extracts to applications that run on Android barcode scanners.
- Design and leverage algorithms to correct real-time data, workflow mistakes / user error, bad data.
- Identify and correct data that is missing or incomplete, often done with programs which are custom-written for each request.
- Work with floor-operators to learn job responsibilities and workflows to more intimately understand software requirements.
- Write documentation for the current environment.

Junior eCommerce Developer | Hall Internet Marketing | November 2021 - August 2022
- Responsible for overhauling repositories with updated configurations for automation of CMS updates.
- Regular testing of sites to identify and remove PHP errors, as well as updating PHP versions to improve website speed and security.
- Custom configuration of products / services specific to needs and vision for each website.
- Work with national companies to conditionally restrict services and offerings depending on geolocation data.
- Implement custom solutions with PHP, JS, HTML/ CSS as needed.

Website Support Manager | Links Web Design | April 2021 - October 2021
- Managed 200+ Wordpress, Joomla, Prestashop websites and ecommerce sites across 25 servers.
- Utilized AGILE practices to manage a team of developers by addressing developmental requests based on timeframe to complete, as well as workload and available skill sets across the team.
- Wrote / tested code for Wordpress Themes using PHP and Bootstrap to implement custom functionality as needed.
- Built and maintained Woocommerce stores.

Apprentice Full Stack Developer | Launch Academy | September 2019 - February 2020
- Completed 30-week immersive bootcamp specializing in full-stack web development best practices along with relevant, real-world problems and the skills needed to address them.
